HOSE METER

Find out how much water you are actually using.

Attaching between your garden hose and trigger nozzle, the Hose Meter shows you exactly how many litres of water you are using.

- Attaches to standard hoses, nozzles and trigger nozzles – all fittings included.
- Can be used for up to 99,000 litres before resetting.
- Proven Oval Gear technology inside.

Research has shown that when people can see how much water they are using, they use less, and this change in behaviour is sustained over time. *

The Hose Meter will save water and conserve the environment.

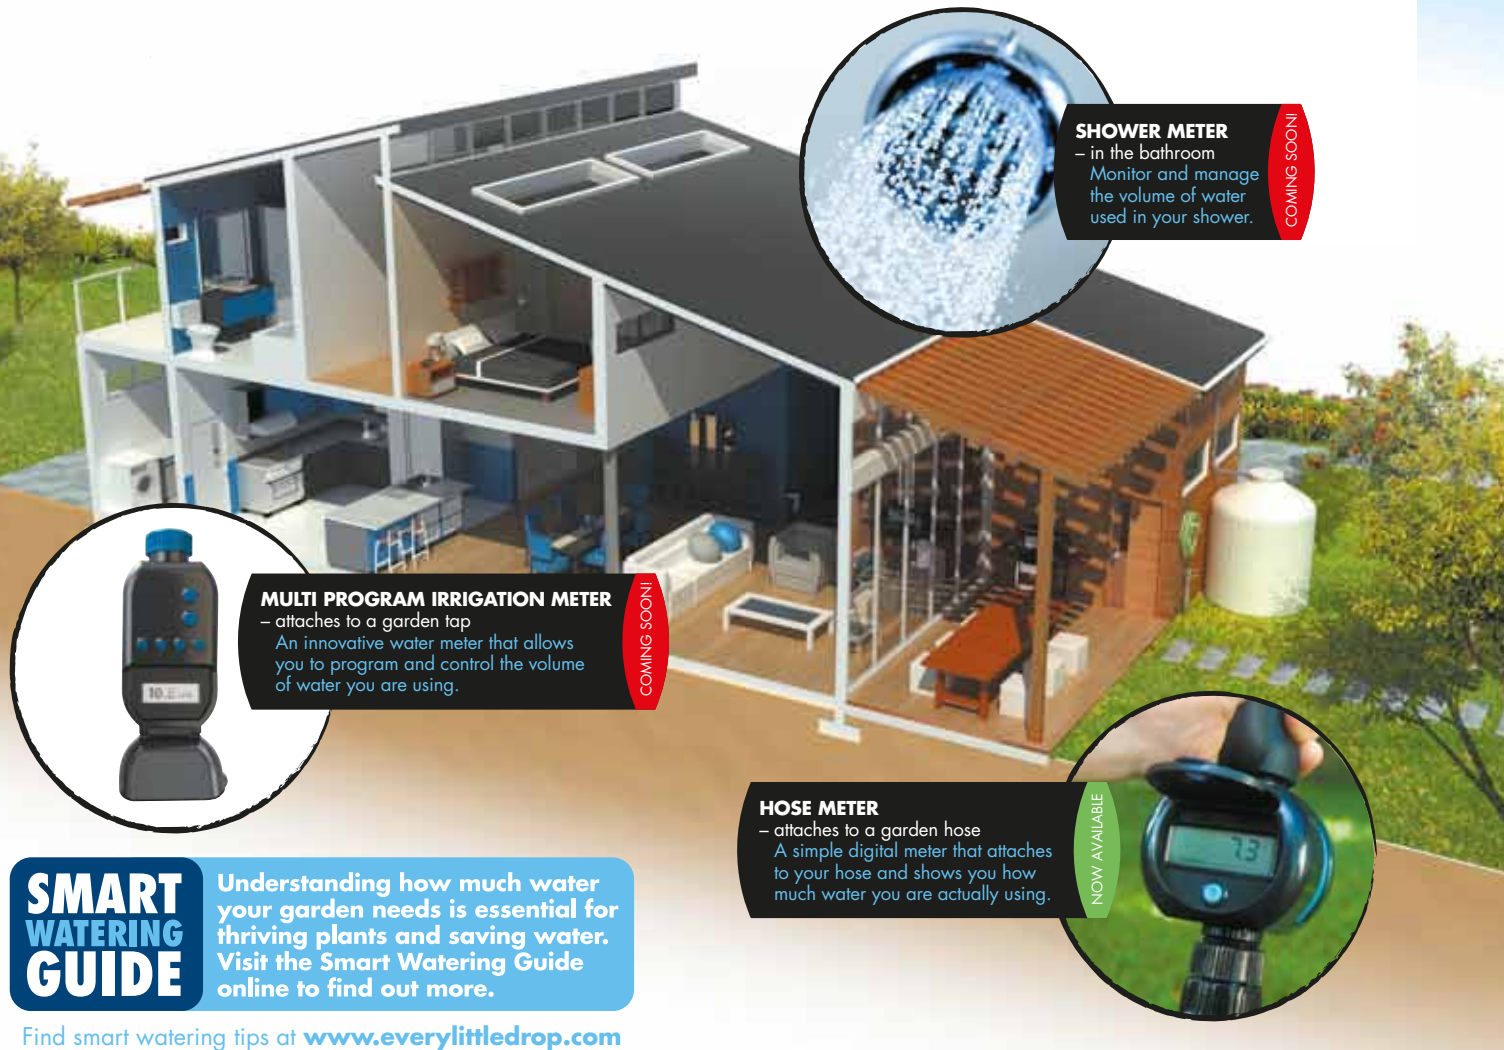

MANAGE WATER AROUND YOUR HOME.

Control and monitor your water usage to save on water bills, conserve household water, and help save the environment.

Every little drop

makes a difference
